Colours

Typography

Note: This is the typography for everything greater than a 576px screen width (medium and large screen sizes, as defined by the grid section below). In the small (mobile) screen size, all font styles are “bumped down” one. For example, the main title on a mobile screen uses h2 instead of h1, a main description uses h4 instead of h3, and so on.

h1 – This is a main title

font-family: Avenir Next font-weight: medium font-size: 40px line-height: 55px (auto)

h2 – This is a section title

font-family: Avenir Next font-weight: medium font-size: 32px line-height: 44px (auto)

h3 – This is a main description

font-family: Avenir Next font-weight: medium font-size: 24px line-height: 33px (auto)

h4 – This is a section description

font-family: Avenir Next font-weight: medium font-size: 20px line-height: 27px (auto)

This is the base paragraph size for small screens. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Cras dapibus vulputate diam eu pretium. Mauris elit orci, ultricies id fermentum vel, porta et eros. Vestibulum condimentum lectus in convallis feugiat. Sed vulputate fringilla felis. Aliquam ut arcu et dui feugiat scelerisque eu quis diam. Mauris placerat congue dui sit amet blandit. Phasellus condimentum libero vel velit auctor, sit amet tincidunt velit varius.

font-family: Avenir Next font-weight: regular font-size: 16px line-height: 22px (auto)

This is the base paragraph size for small screens. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Cras dapibus vulputate diam eu pretium. Mauris elit orci, ultricies id fermentum vel, porta et eros. Vestibulum condimentum lectus in convallis feugiat. Sed vulputate fringilla felis. font-family: Avenir Next font-weight: regular font-size: 14px line-height: 19px (auto)

Grid

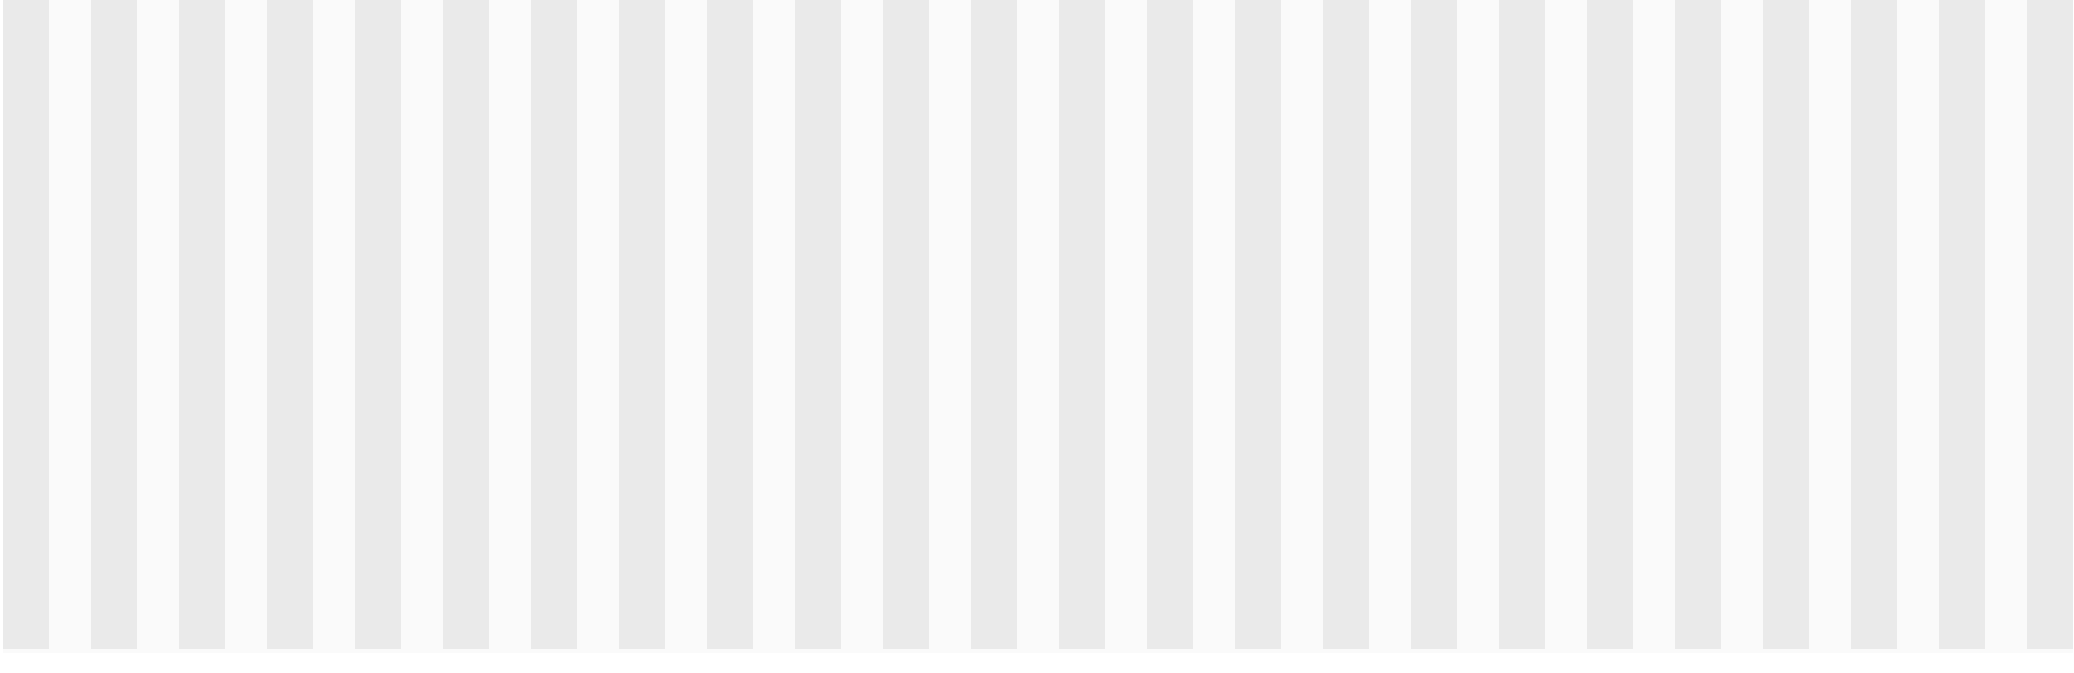

The grid follows the Ant Design 24 column grid with gutters inside. Ant Design has 5 breakpoints, but we will only design for 3 - let’s call them small, medium, and large.

All screen sizes smaller than 576px will follow the small “mobile” styles, between 576px and 992px will follow the medium “tablet” styles, and greater than 992px will follow the “desktop” styles. The gutter is 16px for medium and large screen sizes, and 8px for small screen sizes.

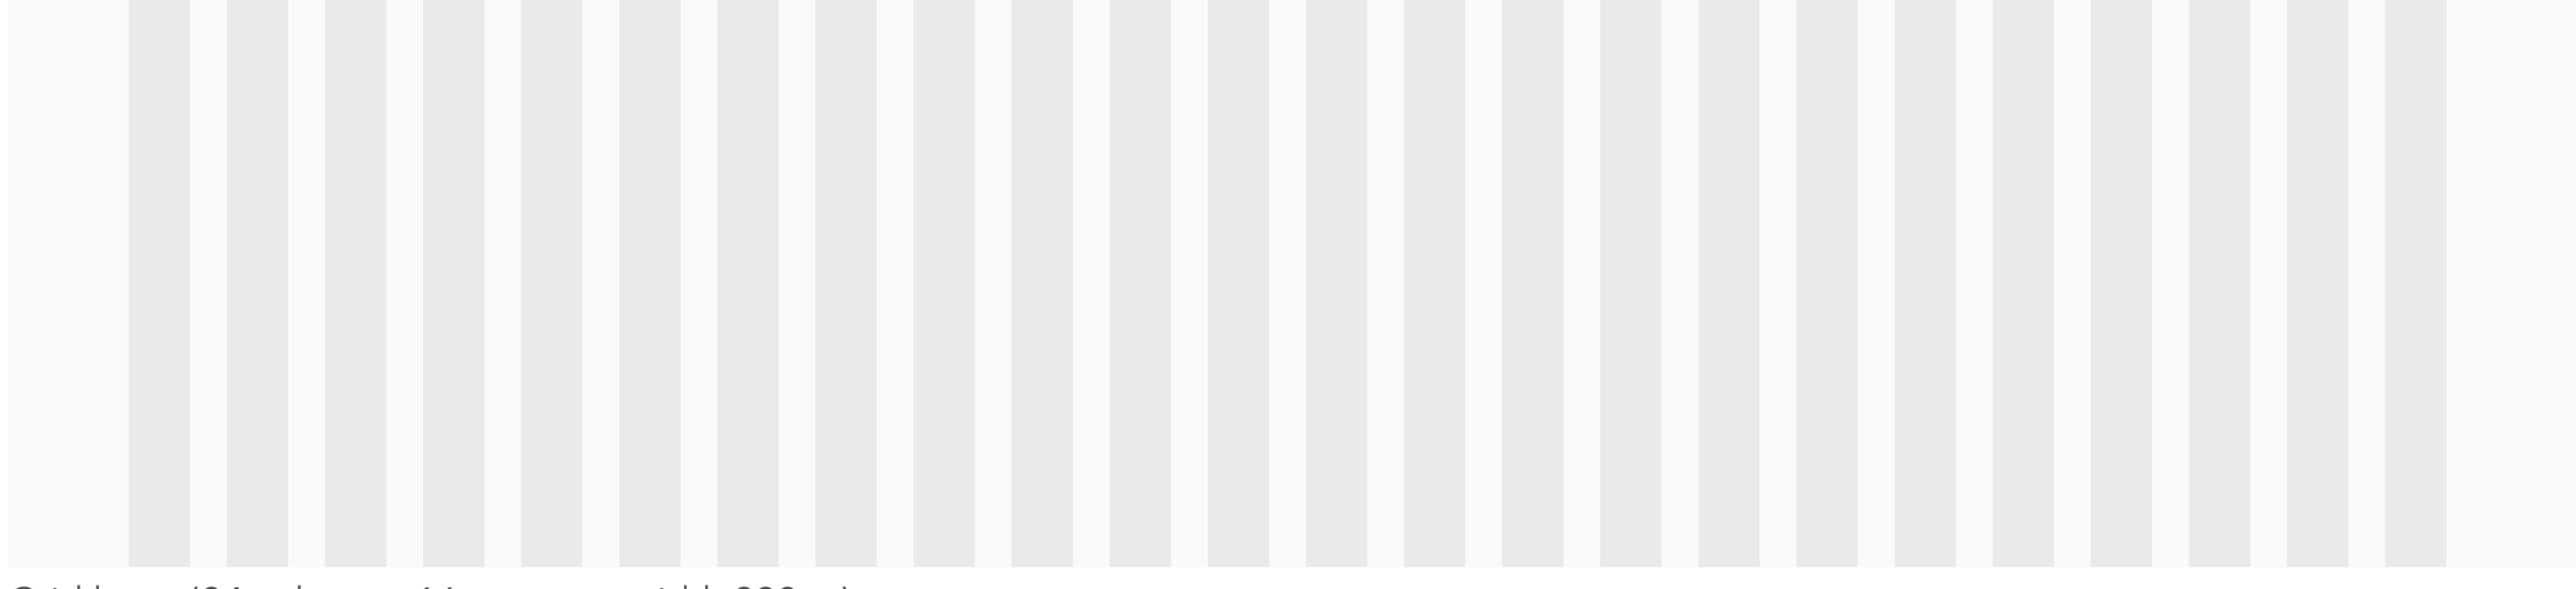

However, for “desktop” styles, we will set the max-width of the grid at 992px. This means that when the screen size is greater than 992 px, the content only spans 992px, and the rest is padding.

Grid small (24 columns, 8px gutter, width 100%)

Grid medium (24 columns, 16px gutter, width 100%)

Grid large (24 columns, 16px gutter, width 992px)

Padding & Margins

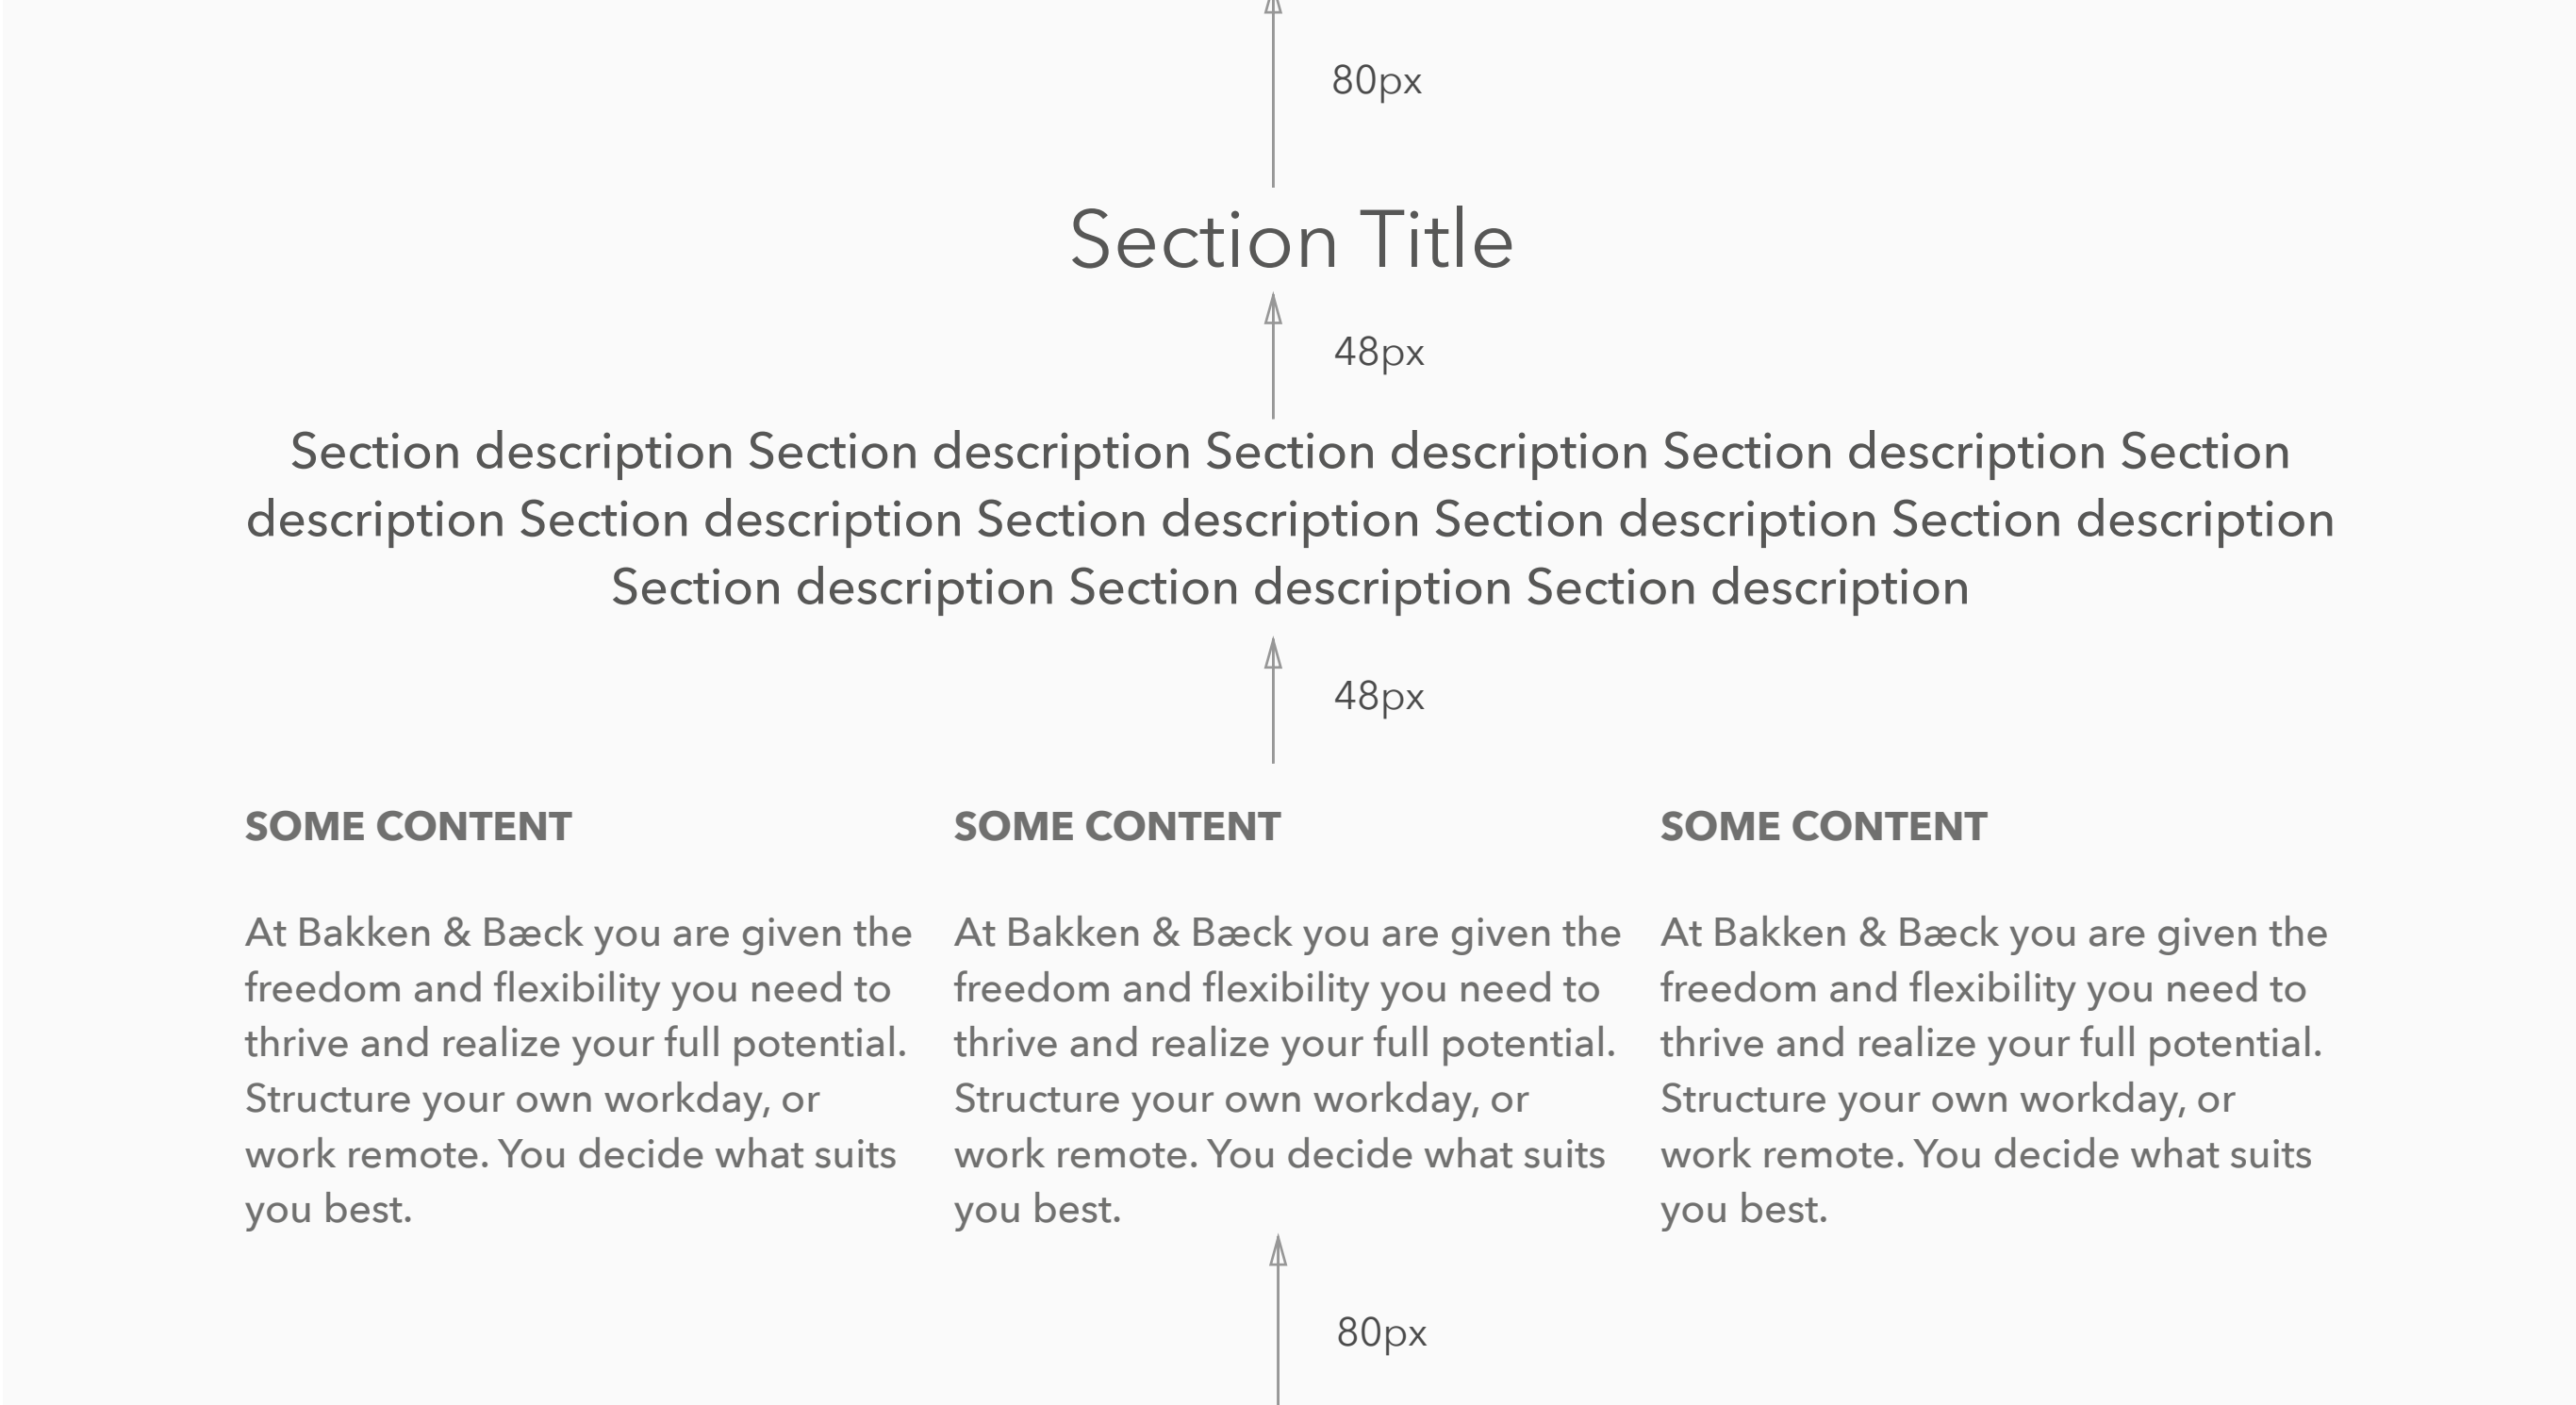

The padding and margins follows an 8 point scale. Below are all the used padding / margin sizes.

16px
24px
32px
48px
80px

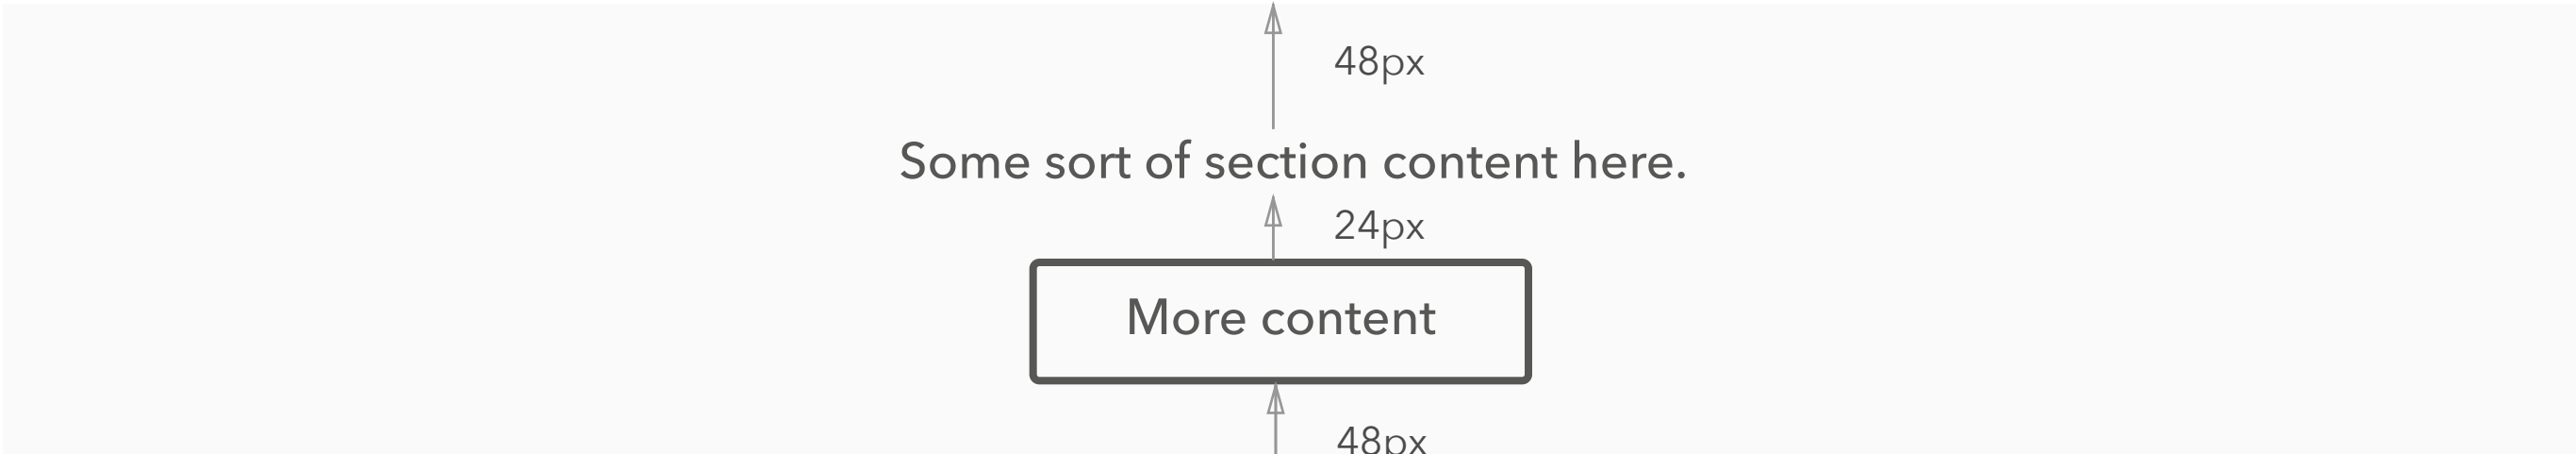

Template

The recurring styles for major template components are detailed below.

Section Large

Section Small

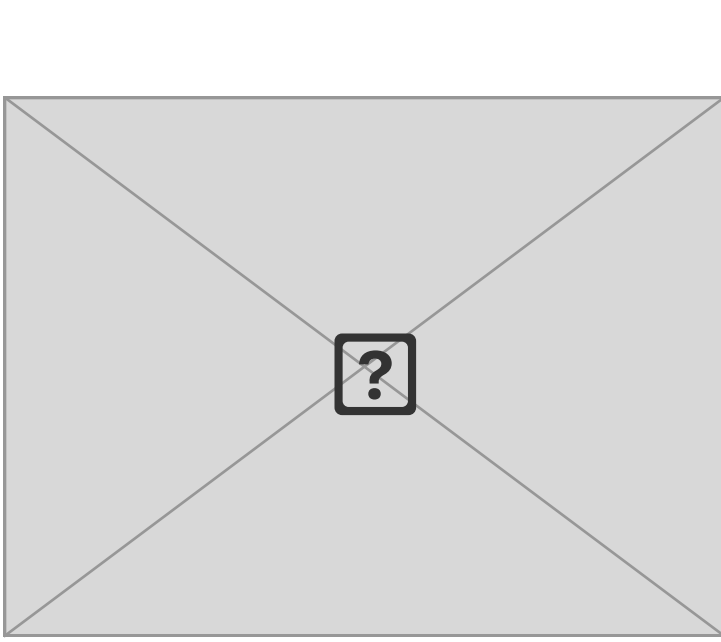

Section Large Mobile

Images

All images either have a 100% width (when they are the background of a section and follow the section template sizing above), a 4:3 aspect ratio, or a 16:9 aspect ratio. The width of these images depend on the screen size, but is based off the grid system defined above.

4:3 aspect ratio

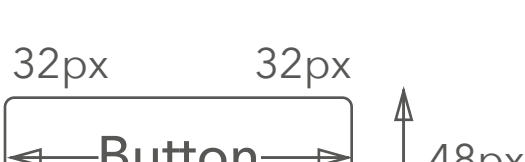

16:9 aspect ratio

Buttons

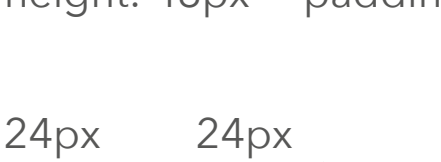

There are 2 button sizes - large for desktop and tablet, and small for mobile, and 3 button styles - primary, secondary, light.

The button sizes and the light style are custom, but the primary and secondary button follow that of Ant Design.

Sizing

Large button
height: 48px padding: 0px 32px min-width: 120px font-size: 20px (h4)

Small button
height: 32px padding: 0px 24px min-width: 100px font-size: 16px (base paragraph large)

Primary

Secondary

Light
